

**NEW GAS SERVICE  
COGENERATION, RATE 7 AND  
LARGE COMMERCIAL/INDUSTRIAL, RATE 9  
CUSTOMER ACTIVITY**

**Customer Activity:**

1. Request new gas service.
2. Request plumbing permit to install customer gas house-line.
3. If gas pressure requirements are greater than standard (seven inches of water column), then an elevated gas pressure permit is required.
4. Schedule onsite visit by Long Beach Energy, Engineering to "size the meter," lay out initial service line routing, and discuss fees.
5. Schedule onsite visit by Planning and Building for plumbing permit review.
6. Discuss telemetering telephone line placement with Metering Supervisor. Customer to provide telephone number after line is installed. Telemetering equipment fee required in advance.
7. Discuss deposit requirement with Energy Services.
8. Review required fees and verify payment.
9. Schedule onsite visit to set gas meter and telemetering index.
